This guide book explains everything you need to know about your new product. Please contact our Customer Care should you need further assistance through www.modena.com.

INSTALLATION

Kitchen tap

1. Create a cut out line as below picture on field will be used. Then holes follow the shape and size has been made.
2. Make sure all seal installed properly and tightly.
3. Connect the hot water and cold water hose then tighten with a wrench.

NOTE:

For single tap, only need to connect cold water hose.

4. Do check the output of water by pull lever tap in the direction of the arrow.
5. Do not use a steel brush, abrasive cleaner or material that contains hard chemical. This could cause the surface of the unit becomes damaged or dull.
